

About Me

Front-End Developer with hands on experience in building scalable and high performance web applications and shared architecture websites. Strong background in developing reusable components, managing application state, and optimizing performance. Experienced in working within multi project environments and delivering clean, maintainable, and user focused front-end solutions.

Experience

Raise Right, Zahraa El Maadi – Front-End Developer

November 2025 – Present

- Developing and maintaining scalable front-end features using Angular and TypeScript. Building reusable and modular UI components aligned with business requirements.
- Integrating REST APIs and handling dynamic data efficiently.
- Collaborating with designers and backend developers to deliver clean and maintainable solutions.
- Improving performance and user experience across web applications

Beni Suef University– Teaching Assistant

March 2024 – present

- Assisting students in understanding programming and computer science fundamentals.
- Supporting practical sessions and helping students apply theoretical concepts.
- Contributing to academic activities and coursework preparation.

Digital Lab, Naser City – Front End Developer

August 2024 – November 2025

- Worked on 5 interconnected websites sharing the same core sections and architecture, with UI and layout variations per website.
- Implemented a shared component-based structure, where updates in common sections propagate across all websites.
- Developed and maintained multiple Angular applications across diverse business domains, ensuring scalability.
- Enhanced user experience by implementing responsive and accessible UI designs.
- Implemented state management solutions using NGXS and RxJS to handle complex data flows and improve application efficiency

Mophx Digital, Mohandesin – Front End Developer

September 2022 – January 2023

- Develop websites with high quality and performance.
- Working on two projects with different needs
- Build and develop the complete project destination from the front-end
